

Manual Keyboards

Klann manual keyboards can be fitted with the key cheeks of your choice – square, angled, rounded or Skinner style. They are also available with the toggle spring simulated tracker touch, standard contact rails or optical switching rails. They measure 33-1/2” wide (between the key cheeks) with 18-1/4” long keys. The frame is 35-9/16” wide x 16” deep.

Key Cheek Styles

Contact Rails

Klann Organ Supply can supply manual contact rails with silver wire contact blocks with four wires. Isolation diodes can be installed. Cables to spreader strips or junction boards can be provided.

Manual Key Contact Rail

Contact Plates

There are two types of phosphor bronze key contact plates:

- Both are tipped with channel silver.
- Manual key contact plate is for manual contact block rails.
- Pedal key contact plate for pedal underkey contact rails.
